ABSTRACT: Acharaya Charaka has advised to examine Sara of every Dhatu to understand strength of Dhatus as well as strength of mind.

Qualitative, quantitative and functional assessment of tissues or seven Dhatus is called Dhatu Sarata. Purest form of dhatu is called as sara dhatu(tissue excellence).

For both aims of Ayurveda, namely, maintenance of health and if diseased, to cure the disease and come back to homeostatic condition, physician needs to know his 'Bala'. Person having maximum symptoms of tissue excellence is called uttam sara. Person having symptoms opposite to Uttam Dhatu Sara is called as Asara Dhatu. Person having moderate symptoms of Dhatu Sara is called madhyam sara. Strength of uttam sara dhatu is best. Strength of asara dhatu is less. Madhyam sara dhatu possesses moderate strength. Physical as well as mental strength can be assessed by examining sarata of every dhatu. Acharaya Charaka has advised to examine Sara of every Dhatu to understand strength of Dhatus as well as strength of mind.

INTRODUCTION

Sara is the essence of Dhatus (Vishuddhataro Dhatu), which signifies the ultimate quality of Dhatu and excellent functional aspect. Sara has been mentioned for the assessment of strength (Bala) and the life span (Ayu) of patient. strength (Bala) means biological strength or power of resistance against the disease, it can be related with immunity of the individual. predominance of particular Dhatu, the number of Dhatu Sara present in the body of an individual will be directly proportional to the power of resistance of the individual. that is why Sarva Sara individual have higher resistance in comparison to Madhyam Sara or Our Sara individual. Dhatu which shows maximum characters mentioned in Samhitas are called the best Dhatu of that individual. As described by Acharya Charaka, it is fallacious to consider an individual to be strong or weak either by his appearance like his plump or emaciated body. some people having small and emaciated body seem to be strong. Thus one should examine the individual in respect to Sara or

excellence of his Dhatu. So it is quite clear that inherent power of a person can not be assessed by bulk and size of the body but it is only judged by the Sara examination. Individual on the basis of Sara have been classified into various categories depending upon the predominance and quality of a particular Dhatu in the body, except the Satva Sara which is based on predominance of Satva (Psychic Factor) in the body eight Sara have been described in texts of Ayurveda i.e. Twak Sara, Rakta Sara, Mansa Sara, Meda Sara, Asthi Sara, Majja Sara, Shukra Sara, And Satva Sara. AIM To examine Sara of every Dhatu mentioned in Charaka Samhita and Sushruta Samhita to understand strength of Dhatus as well as strength of mind MATERIALS All the description related to Dhatu Sarata available in Charaka and Susruta Samhita was collected and reviewed. CONCLUSION

Ashtavidha Dhatu Sarata explained by Acharyas in Samhita, knowledge of Sarata is important for maintaining health and also curing disease. Acharya Charaka has also described that the individual having the excellence of all Dhatus (Sarva Sara) have great strength, happiness, resistance to difficulties, and self confidence in all enterprises. Virtuous acts, and firm and well build body, correct gait, resonant melodious and high pitched voice, happiness, power, wealth, enjoyment, honor, slowness of aging process, resistance to disease, having more progeny and longevity. The higher percentage of characteristic represents the good quality of Dhatu. Examination of the Sarata of Dhatu is helpful for the preventive and curative aspect i.e. the Dhatu which is of weak quality in an individual, may be treated with good diet to increase the strength of that Dhatu.
